TUESDAY, NOV. 11.—P.M.

There is a continuance of the downward tendency in the Fancies to-day, with an exception or two, and the operators for a fall appear to have taken courage to make a movement. The large re-sawed exports of coin, although not to an extent to create any apprehensions of stringency in the money market, are yet sufficient to give some confidence to the "bear" party in stocks. There is also more or less apathy among outsiders, which for the moment assists the downward tendency. Erie was among the heaviest stocks, but the sellers were not numerous. It closed at \$31, a fall of 2 1/2 cent since yesterday. There is nothing new in the condition of the Company to cause this fall, but the "bulls" in it seeing the disposition of the "bears" to hammer the stock, quietly let them have the market. Norwich is also dull, and declined 2 1/2 cent. Harlem fell off 1 1/2 cent. Canton 1 1/2 cent. Stonington 1 1/2 cent. Ventures 1 1/2 cent. Reading was in better demand, and was firmer than other stocks, closing at \$51, the price of yesterday. The sales were over 4,000 shares, of which 2,500 were at 25 1/2 to 56, buyer sixty. It is not unlikely that some decision has been had in regard to a dividend, which has been privately communicated to some of the operators. Government and State stocks are in fair demand, and the former have advanced 1/4 cent. New-York 6s, 1862, improved 1 1/2 cent. The demand for Sterling is moderate, but the market is very firm. Leading drawers ask 10c. a cent for Sterling. Franks 5 1/2 to 5 1/4.

Freights are without change, but not active, the vessels on the berth for London and Liverpool being nearly full. We notice engagements to London per the packet of the 1st proximo for 2,300 bxs. Cheese 35s., which is an advance, and 1,000 bxs. Flour 21d. To Liverpool, 500 bxs. Resin 12d., 1,000 bxs. Flour 12d., Grain 4d. asked, Cotton 1d., Cheeses 20s., 100 tuns Oil Cake 20c. To Glasgow, 2,000 bxs. Flour 13d., 18d., 500 bxs. Cheese 25s. To Havre, the Steamer of Saturday is full at 1d. for Cotton. A stave freight was made to Tarragona, an American bark at \$14 for light pieces. Two charters from Norfolk to Barbadoes and Demerara at \$11 and \$12. There is a good demand for vessels to take timber at Norfolk for the North at 12 1/2, and deals from the British Provinces to England at 24, but shipmusters decline these rates. For California there is a moderate business at 16c. to 30c. p. foot.

The Marion, from Charleston, to-day, brings \$80,000 in coin.

The Franklin, for Havre on Saturday, has \$400,000 engaged, partly silver. This amount will not probably be much increased.

The amount received at the Sub Treasury is \$62,738, paid 26,674, balance \$3,481,656.

To-morrow, (Wednesday) at 3 o'clock P.M. is the latest moment for handing bids for the Northern Indiana Railroad Bonds, to which we have before alluded. From what we can learn the bids will be to a large extent.

The growing cheapness of money in London and Paris must eventually rest upon our market. Capital is inactive in London at 2 1/2 cent in large parcels, and in Paris at 14 1/2 cent, and this state of things can scarcely continue there, and money remain here at 6 1/2 cent. The connection of the London Money market with ours is too close for such disparity to continue. London bankers will not have their balances sent home to be loaned at 2 1/2 cent, when they can be safely used here at 6 1/2 cent.

The earnings of the Michigan Southern Railroad for October were \$33,589, against \$29,096 for the corresponding month last year. For the last six months of the year, the earnings, as compared with the same months in 1848, are as follows:

IN. \$.	IN. \$.
May.....	\$10,954
June.....	8,342
July.....	7,667
August.....	10,317
September.....	20,483
October.....	22,956
Total.....	\$92,966

Increase..... \$87,57

=equal to 95 1/2 cent.

The deposits of gold at the mint, which are the best test of the amount actually received, show that the reports upon the arrivals of the various steamers are not exaggerated, and that the amounts in the hands of passengers are under rather than over estimated. The reports have been as annexed.

Cherokee, on freight..... \$1,393,163 Passengers..... 150,000

Ohio, Passengers..... 180,000

Ohio, on freight..... 30,000

Prometheus, Passengers..... 60,000

Total..... \$2,093,163

New-the actual deposit at the Mint this month up to this morning have been \$2,010,000, showing a remarkable agreement with the estimates, and indicating that the receipts from California this month will probably be over five millions. It is stated that \$900,000 in gold came over from Philadelphia yesterday.

The \$100,000 of Central (New-Jersey) Railroad Bonds sold at auction to-day at \$14 down to 45, closing at \$5.

The demand for Dry Goods continues to become more limited, as the season advances. The Clothiers are beginning to make their purchases, but at present in but small parcels. The articles still active are Shawls and Delaines. Cotton Yarn is in demand at 15c., cash. Cotton Goods are dull. Browns, with a light stock, are firm at 6 1/2 cent. Bleached are in heavy stock, which favors the buyers considerably, yet quotations are without change. Drills are lower by 1c. browns at 7, bleached and blues 7 1/2 cts. Oshkoshes are very inactive. Denim is rather more request, but the sales are not large, and prices are steady. Stripes are in moderate demand, and the stock is ample—prices are without change. Ticks are dull—a few parcels of medium qualities have been sold for the California markets. Canton Flannels are active at moderate prices. Printing Cloths remain inactive. Prices are low and without prospect of an advance. Prints still sell to a considerable extent for the season, and without any falling off in prices. Ginghams are not so active, but the supply has proportionately fallen off, and as the market is without a heavy stock, prices are steady at 10 1/2 to 11c. for Glasgow, and 10 1/2 to 11c. for Liverpool. Shawls are selling actively at firm rates. The Bay State Shawls are having a larger run, at good prices. This favorite style of Shawls at once moderate in price and generous in style, has returned a large pro-

portion of the manufacturer. There is no overstock. The supply which has been larger than in any previous year has not been more than equal to the ever-extending demand. Clothiers are inactive. The demand is confined to the clothiers. Consumers, both fancy and plain, are very steady in price, but the demand has abated. Satinets are dull and heavy. Sheep Grays are active and firm. Linseys are dull at low rates. Flannels are in request and firm. Blankets are full. All for eight goods have become dull. In British goods, the demand is principally for cloths. Delaines are in demand. The price of Cloths is much reduced, but at present quotations the market appears firm and favors the buyers. As a month or two hence an improvement is anticipated, French goods are in large supply. They form the bulk of the auction offerings, but the demand is abating, and the auctions are declining. The imports are light. The silk jobbing houses are more active than other jobbers, and boast considerable of a good steady business yielding fair returns. The payments from the interior, except from the South, are prompt and regular. The Southern business has been the only business doing this fall, and those houses who have been disengaged by Southern dealers have fared the best.
